

Story /

Who the hell really knows what [lengths], [weight], or [numbers] of [lies] are required... before [someone] or [something] just goes right ahead, and then recklessly loads a single [chamber], or multiple [chambers]...?

I think that's a [perfect question] for anybody to ask...  
[Probably sounds fuckin' stupid at this point], how many [possibilities] are on the table.

However, I think [one thing is perfectly clear]...  
[Lies] definitely have the capacity, of being [pretty evil].  
But- [lies] have the capacity for being [pretty good], or even in some cases [pretty funny].  
It just depends on what type of [lie] is at hand.

I mean, just how [evil] could a [lie] actually be...?

Well, probably [evil] enough to convince a person to [load] a [chamber] of some sort.  
What type of [chamber], is beyond me.

What the [chamber] would be [loaded] with...?  
Well, that's anyones' guess.

Sure [sounds like] it'll get [loaded] at some fuckin' point...

These questions barely scrape the surface of the statement.  
[Lies load the chamber].

How so...? Well, it is [expected], that [anyone] who [thinks about these questions long enough],  
arrives at [many answers] that cause the [sentiment] to [make total sense].

I mean really, [it probably sounds pretty stupid], but this is the core of a [philosophical inquisition], here.

Anyone would probably come right out and make an [assumption] that the phrase means it's gonna be a friggen  
person [loading] a [gun chamber] with [bullets], but the [question] still remains as to whether they're gonna  
[fly right off the handle in a fit of rage], and do that, or...  
...if they can [tolerate] the [behaviors] of [normal human beings] that [casually lie a lot].

Further to that point, it's pretty fuckin' vague...  
If I say my [shoes] are [black], but they're [white]...  
...is someone [literally] going to [load] a [gun chamber] with [bullets]...?  
And if so, do they [intend] on [shooting somebody]...?

Uh- cause, ya know, what the fuck is the [motivation] here...?

What [level] of [lies] would [likely lull] a [likeable Larry], into the [loading] a [chamber]...?  
Would it be [thousands] of [really insignificant lies]...?  
Or, [(1) really serious lie] combined with (1) of those [white lies]...?

The statement suggests that it has to be at least [(2) lies]...

So, if the first one is a really serious [lie]...  
...and then you see the error of your own ways...  
...and you vow to never [lie] again for the rest of your life after that...?

Then, you [might] not ever have to [worry] about dealing with a [loaded] [chamber]...  
Nah. Haven't quite met the condition...

(2) of em though...?  
[Well, that's where somebody's drawin' the fuckin' line, pal]...

Might've been off the hook having [lied] only that (1) time...?  
But- the moment you even think about crossing over to saying a second [lie]...?

You're basically fucked, dude... apparently the [chamber]'s gettin' [loaded], for certain.

So, theoretically, the first [lie] could've been a [little white lie].  
Might not have been pissing [anybody] off with the first white [lie] that you said.

But I mean, any additional time after that, is like [rolling the dice].  
You want to avoid at all costs, the [loading] of a [chamber], by having [lied] multiple times.

Because, whether the [second lie] just so happens to be [another white lie],  
or... it's a rather disastrous one...? You're really [playing with fuckin' fire], and taking a [gamble].

Because at any given moment, that could be the point where the [chamber]'s gettin' fuckin' [loaded].

Or, could it be a combination of a bunch of [relatively harmless lies] mixed in with a [phenomenally large],  
[serious], and [heavy lie]... a [lie] that lay above the rest of them...

That could be the [final stage] where a [chamber] manages to become [loaded] by [somebody].  
Wasn't quite loaded yet, at least not until that [moment began].  
Then, it sure as hell was...

But I mean, that's just it. Who knows whether it'll be [somebody] that does this, or it won't be.  
That's another question here.

Because, once the (number/severity) of lies is determined, will it be a [person] that winds up [loading]  
a [chamber], and if so, what type of person will it be...?

What if [they've] lied before...?  
Then you may be left with [liars] on [both sides] of the equation...  
And that's really somethin' to consider...

Then again, maybe it'll be a non-person, like a [drone].  
Or what if it's [artificial intelligence]...?

Maybe it will be a [ChatGPT] instructed (drone/robot) programmed to wait for someone to lie more than  
(1) time, before it indiscriminately [loads] a [chamber].

Yeah.

But that raises yet another question...  
Just what is it that will be [loaded] into the [chamber]...?  
AND, what type of [chamber] will even be [loaded], to begin with...?

[It probably sounds pretty stupid].  
Anyone could probably come right out and make an [assumption] that it's gonna be a friggen  
[person] loading a [gun chamber] with [bullets].

But- [that takes all the fun away] from [asking these questions], and arriving at [another creative conclusion].

I like to take the "*If Peter Piper picked a pack of pickled peppers, how many pickled peppers did Peter Piper  
pick...?*", or "*How much wood could a woodchuck chuck, if a woodchuck could chuck wood...?*", approach here.

The reason being, you can [literally] think of [questions] that [seemingly have no end at all],  
when [asking], [just what the hell does the name of the band actually mean]...?

[Lies Load the Chamber].  
I mean, it's not unlike [Bull in a China Shop].  
What the fuck does it mean...?

[How many lies are needed], before the [chamber] is [loaded]...?

Does the (number/severity) of lies affect the rate of speed at which the  
chamber is (hypothetically/allegedly) loaded...?

[What] is the [chamber] [loaded] with, and by [whom]...?

[How long does it take], before the [chamber] goes from [not loaded], to [loaded]...?

[What size chamber] are we talking about here...?

Can [other things] be loaded into the [chamber]...?

[How often will the chamber be loaded], or is it a [one time deal]...?

Can the [chamber] be obtained [already loaded]...?

Can the [chamber] actually be like a [gas chamber] like in [Auschwitz], where [Hitler] [lied] to a lot of  
people, and then loaded up the [gas chamber], and killed a lot of people.

Look.  
I think I speak for everybody when I say, perhaps people should [chill out] before they make [assumptions],  
[flying off the handle and whatnot]. Fact of the matter, is that there are [multiple ways to skin a cat].

That's the [point] of this [whole entire document], not so that I could ask a seemingly [infinite questions]  
about [lies], somehow causing an entity somewhere, to load a fucking [chamber] or two... with whatever seems  
to be the most obvious thing it'd get loaded with... because that would be an [assumption]. And, [assumptions]  
cause [people] to [act] in a rather [narrow sighted manner].

[Some people] are [aware] that [most people] make a [lot] of [assumptions] every single day, and they also

know how to [shape people's societal expectations], whereby causing them to [make] the [assumptions] that [they want those people to be making].

That right there, is not unlike [lies loading the chamber], somehow.

I mean really, you can use this [particular approach] with next to [any subject matter at all], in order to learn how to [ask better questions].

And that's just it.

If you're [not asking any questions], and you're [operating on your assumptions], then there's the [possibility] that [not asking those questions] causes their [intelligence level] to [remain low].

Nah.

Because asking questions allows people to tell the difference between whether it's a [lie] of significant weight, that winds up causing a [person who's lost their mind], to load a [gun chamber] with [bullets]...

Or, if it's an [evil prick] like [Hitler] that's [lying] to a [bunch of people], in order to get them to agreeably walk into a [gas chamber] where they then and there [die], with [no chance of escape], whatsoever.

[Lies load the chamber].

The point being, [how many things can a statement like that be applied to, in conjunction]...?

It's not unlike the album [Presidents of the United States of America]...

...being recorded by the band [Presidents of the United States of America]...

...which is not consisted of by any of the official [Presidents of the United States of America].

Multiple available applications of that phrase...

[Presidents of the United States of America].
