

# //\\\_\\\_//\_\\\_\\\_ Translating Slavic [→] English \_\\\_\\\_//\_\\\_\\\_

## / Introduction /

This picture isn't suspicious or anything.  
Everything else is in English...?  
This suddenly came up as (Czech/slavic).

```
<#
233 | é
250 | ú
345 | ř
237 | í
277 | ě
353 | š

Kybernetické útoky patří k největším firemním hrozbám
vašich zaměstnanců se na firemní síti chová
nezodpovědně
Jste na to připraveni?
#>
```

At first, I thought that it was saying something like “If you're NOT gonna play with your dick in a bathtub all day, then who the hell even are ya...?” But, I was wrong.

## / Analysis /

## / Introduction

At first glance, I believed this was the Russian language, however after the work that I did above, I was able to determine that this is indeed the (Czech) language.

(Czech/Russian) are both slavic based languages, and slavic languages are pretty easy to identify because they use a lot of K's, and a few Z's are thrown in there too. I actually thought it was Russian, but it appears to be the case that it is Czech.

Russians are typically the number #1 threat in terms of cyberattacks, though they might blend in with other somewhat nearby countries, and between Europe, Eurasia, Czech Republic, Ukraine, Turkey, Azerbaijan, and Afghanistan... there does appear to be a mixed bag of slavic based languages.

Anyway, in order to access those characters that have the accents, degree signs, accented grave's and shit like that, you have to know how to use this program called “Character map”. Especially if you don't know the language, or you don't change the keyboard input to be primarily set to the Cyrillic alphabet. But, you may also be able to access the characters directly, by entering in the numerical index along with the `[Char]` symbol.

Whether the language is Russian or Czech, the process will be virtually identical, because they both use letters of the Slavic alphabet. This process will actually work for any language that uses (Unicode/UTF8).

```
Class Character
{
    [UInt32] $Index
    [String] $Char
    Character([UInt32]$Index)
    {
        $this.Index = $Index
        $this.Char = [Char]$Index
    }
}

Class CharacterList
{
```

```

[Object] $Output
CharacterList()
{
    $This.Output = @( )

    ForEach ($Index in 0..1024) # This number (1024) goes as high as (65535)
    {
        $This.Add($Index)
    }
}
[Object] Character([UInt32]$Index)
{
    Return [Character]::New($Index)
}
Add([UInt32]$Index)
{
    $This.Output += $This.Character($Index)
}
}

```

Once you're able to instantiate these classes above in PowerShell, then you can really do some damage.

```

$Chars = [CharacterList]::New()
PS Prompt:\> $Chars.Output[192..377]

```

PS Prompt:\>

See how easy that is now, to look at all of the possible characters that somebody would need to access, in order to use something like "translate.google.com"...?

Lots of symbols to look at and review...

```
<# 225 | á || 233 | é || 237 | í || 250 | ú || 277 | ě || 345 | ř || 353 | š || 367 | ů  
Kybernetické útoky patří k největším firemním hrozbám  
vašich zaměstnanců se na firemní síti chová nezodpovědně  
Jste na to připraveni?  
#>
```

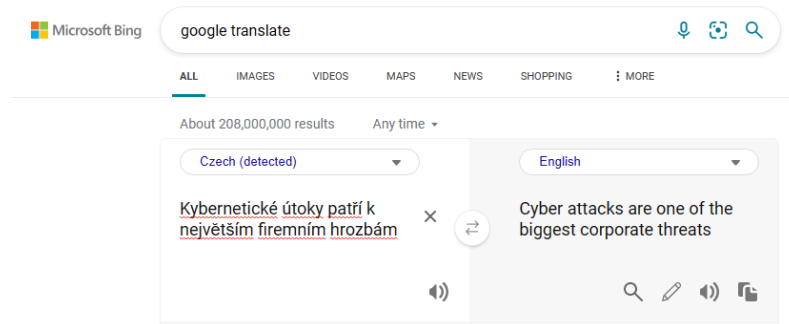

Now, at first glance, some english based reader such as myself, is gonna have NO IDEA, what the hell that says. The context of the image, was from the default loadout of clicking on Microsoft Edge, after I had just posted a link to an article about how DNS servers are being attacked by Android device malware.

So, once I posted a link to that particular article, I was able to proceed in looking at various things in the Microsoft Edge news feed. And wouldn't you know, holy crap. Looks like a language that shouldn't be showing up.

Time to whip out the Bat belt of tools that I just wrote, up above...

-----/ Analysis  
Translation /-----  
/-----

Mirror mirror, on the wall... What the hell does this sentence say...?  
"Kybernetické útoky patří k největším firemním hrozbám"

Uh-oh. It says : "Cyber attacks are one of the biggest corporate threats."

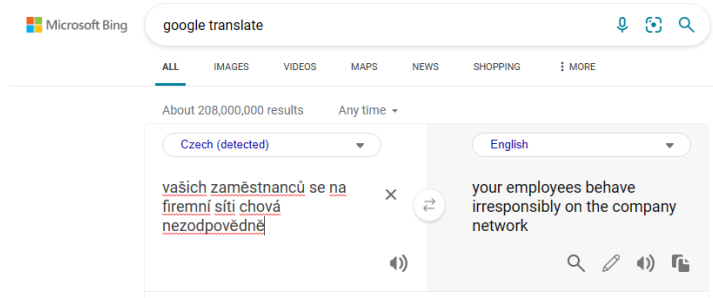

...not : "If you're NOT gonna play with your dick in a bathtub all day, then who the hell even are ya...?"

And that's a problem, because if I genuinely thought that it said that, and that's NOT what it said...?

I would wind up looking virtually identical to some guy named Michael Zurlo, from the Saratoga County Sheriffs Office, basically misbadging certain information and not caring if I was wrong at all.

Shucks. I wonder what the next part says...

"vašich zaměstnanců se na firemní síti chová nezodpovědně"

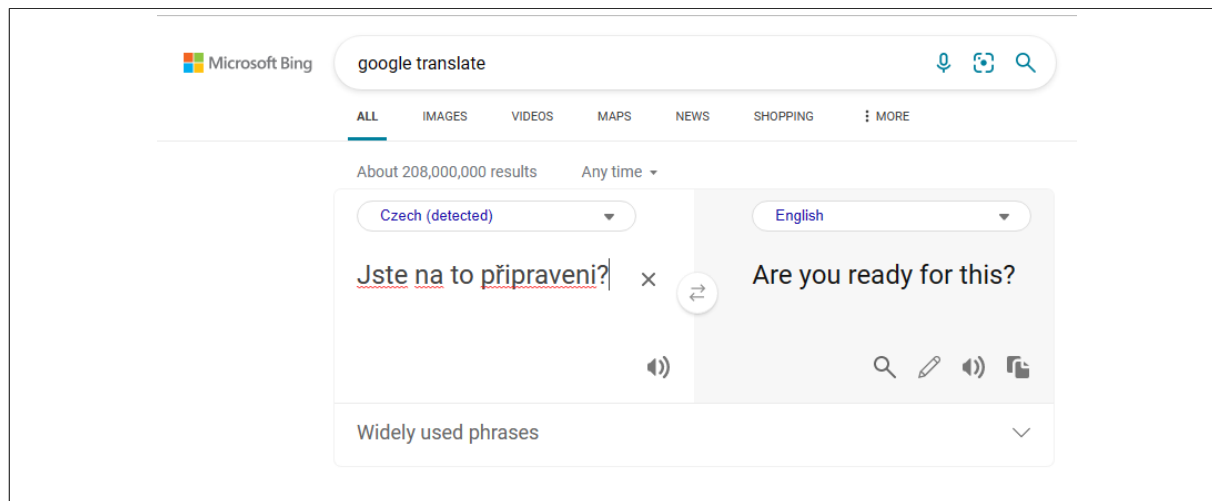

Oh wow. "Your employees behave irresponsibly on the company network..."

Almost like "Your police (deputies/state troopers) sometimes drag their lazy dicks all over certain records."

That's fuckin' really quite accurate from what I have observed about the police in Saratoga County, NY.

What else do we have left to find, here...?

"Jste na to připraveni?"

Oh, wow. It's asking me if I'm ready for this. I'm getting Space Jam (1996) vibes...

At this juncture, I have no idea whether the cyberattack I just copied and pasted a link to, prior, about [www.msn.com/en-us/news/technology/wi-fi-routers-are-being-hit-by-a-dangerous-new-android-malware-with-extra-dns-hacks/ar-AA16zw0c](https://www.msn.com/en-us/news/technology/wi-fi-routers-are-being-hit-by-a-dangerous-new-android-malware-with-extra-dns-hacks/ar-AA16zw0c)

...has anything to do with this strange, mysterious message in a different language showing up all of a sudden.

-----/ Translation  
Breakdown /-----

I mean, lets go over some realities here.

- #1) This is EXTREMELY RARE, because typically over the course of the last X amount of time, 99.99999999% of the things I get to see on the Microsoft Edge startup page use the ENGLISH LANGUAGE as the input.
- #2) I just posted a link to that thing I just mentioned up above, like about a moment before I saw the content of the picture in the beginning of this document.
- #3) I talked about Vladimir Putin and Russians, as well as cyberattacks in a particular audio log that I recorded on 01/19/2023... (among many others)  
<https://github.com/mcc85s/FightingEntropy/blob/main/Audio/Logs.md>
- #4) I'm at the (Price Chopper/Market 32) located in Shoppers World Plaza, in Clifton Park NY, in the same location that I typically get to see Sergeant Bosco, much like in this video here...

=====

| 09/12/22 | Sgt. Bosco | <https://youtu.be/a9w9oSNvMQM> |

=====

- #5) I literally wrote up a transcription of the video "Exposing Pegasus Part 1" which talks about a program that Sgt. Bosco, Michael Zurlo, and various other members of the community have been too lazy to investigate, which occurred to me back on May 26<sup>th</sup>, 2020.

=====

| [https://github.com/mcc85s/FightingEntropy/blob/main/Docs/2023\\_0115-\(ExposingPegasusPart1\).pdf](https://github.com/mcc85s/FightingEntropy/blob/main/Docs/2023_0115-(ExposingPegasusPart1).pdf) |

=====

- #6) That document references Khadija Ismayilova, who was ALSO a target of this program, Pegasus. I also talk about various other things that might intrigue someone like:
  - Julien Assange - Cybercommando, journalist, WikiLeaks, awesome bastard
  - Edward "Don't f\*\*\* with me, bro" Snowden - Cybercommando, former CIA+National Security Agency contractor
  - Claudio Guarnieri - Cybercommando, Amnesty International Security Labs
  - Bill Marczak - Cybercommando, Citizen Lab

Look, are all of these things related...?

Maybe, maybe not. Who the hell even knows, really...?

Alls I'm saying is this...

Why am I looking at something in a totally different language in close proximity to all of these bullet points up above...? Well, this is a question that I am able to ask myself.

Why would I have the initiative to ask myself this question...?

Uh, because the CONTEXT of the given situation at hand tells me that somebody's trying to communicate with me on either a metaphorical or a literal level, by saying:

Statement	Translation
Kybernetické útoky patří k největším firemním hrozbám	Cyber attacks are one of the biggest corporate threats.
vašich zaměstnanců se na firemní síti chová nezodpovědně	Your employees behave irresponsibly on the company network.
Jste na to připraveni?	Are you ready for this...?

I know that cyberattacks are one of the biggest corporate threats, but they're also sometimes a threat to national security, and that's no bueno.

I don't have any employees (currently), but maybe it's the closest translation possible to "Employees often behave irresponsibly on the company network"

And then... am I ready for this...?

-----/ Breakdown /-----  
Israeli Phantom /-----

Back on October 24<sup>th</sup>, 2022, I had a dream that I woke up from in the middle of the night, and then pounded out this document called "Israeli Phantom".

I had actually written the first part on September 24<sup>th</sup>, 2022.  
Then I had another dream that was basically an extension of that one.

I have a lot of dreams that are extensions of prior dreams I have had, and I also have these waking flashbacks when I am awake, where I remember a specific dream that I've had at some point.

I had a dream that I was stuck in Israel or Russia, and some slick foreign kid took my fucking phone.

I somehow had some way of tracking him down and wanted my fucking phone back, and he kept acting nervous.

I explained to him that I wanted my phone back, and that if I didn't get MY phone back...? He would be killed as soon as I found him.

He didn't like that, and he knew I would chase him to the end of the earth and fulfill my promise.

So, that's when he wound up returning with a DIFFERENT phone which WASNT MY PHONE, it was a SMALLER phone, not the PLUS SIZE phone, and so I had to whip out my service pistol and put it against this kids head.

At which point, this kid started sweating bullets and literally pissed his pants.

Wanna know why...?  
Well, it's because I know that the dream I had, is the person in REAL LIFE, that I keep taunting with my audio logs. Someone with MALICIOUS INTENT has been WATCHING and SURVEILING me, for a pretty KEY SPECIFIC FUCKING REASON, and... they have been having dreams about me.

I have been putting the fear of God and death itself, into someone's heart, in real life... through my Facebook account.

They know that I am the antithesis of the Boogeyman, I'm not coming as a surprise... I'm being VERY DELIBERATE, and METHODICAL, and have detected all of the fuckin' cockroaches in my god damn way, and this person I just dreamt about...?

They are fucking terrified of me for some reason. Why...? Because they know that nothing is going to stop me from making my way to him, in the same exact manner as MacDuff in the William Shakespeare play, MacBeth.

I'm coming for this son of a bitch, he knows it, I know it, and nothing is going to stop me from making it to this kids throat and neck.

Strange how I just wrote about MacBeth in a document where I talk about Elon Musk, going around, decimating many

people in his way, talking about (Davos/World Economic Forum) in this particular document...

[https://github.com/mcc85s/FightingEntropy/blob/main/Docs/2023\\_0119-\(MuskWEF\).pdf](https://github.com/mcc85s/FightingEntropy/blob/main/Docs/2023_0119-(MuskWEF).pdf)

-----/  
Conclusion /-----

-----/  
Israeli Phantom  
-----

I'm just going to leave this off with the last question "Are you ready for this...?"

To answer that, I'm just gonna flat out say something like...

I don't think anybody ever really knows when they're ready for something... or not.

Which holds some accuracy.

I'm not gonna go around, telling myself "I was BORN ready for this shit, bro..."

But- maybe I've been waitin' for the day to finally come...

...where I just whip out the stupid cheesy ass puns and get to work.

The only question is, where do I begin...?
