⁻⁻ Global Spyware Scandal: Exposing Pegasus Part One (full documentary) | FRONTLINE Link: https://www.youtube.com/watch?v=6ZVj1_SE4Mo 05:29 - Pegasus/Phantom is designed to infect phones like iPhones or Androids. And once in the phone (Partially incorrect, already on the phone from the factory) it can extract and access everything from the device, the phone books, geolocation, the messages, the photos, even the encrypted messages sent by Signal or WhatsApp. 05:47 - It can even access the mic or the camera of your phone remotely. 05:57 - It's like a person over your shoulder, a person who will see what you are seeing, a person who would watch what you are watching, your emails, your encrypted communication, everything. 06:07 - So, once you are infected, you're trapped. (Partially wrong) I believe that every device comes with the infection ALREADY PRESENT. Every device comes with these ZERO DAY VULNERABILITIES that have not been disclosed by the NSO Group. It's like this... A hacker or a series of hackers found a LIST OF VULNERABILITIES that exist on the device's (firmware/operating system), and neither Google nor Apple have had a single day to resolve those vulnerabilities, because they have not been leaked. Typically, these companies will issue a "bug bounty" for any found vulnerabilities, and this allows these companies to address those vulnerabilities. When the bug is discovered, and then it is KEPT SECRET... then those companies CANNOT PATCH THE VULNERABILITIES. That means that it's like someone has been STABBED, and can't actually (pull the knife out/dress the wound). The blood will just continue to leak out of the victim's body. That's what (Pegasus/Phantom) does. So, saying "once you are infected, you're trapped", I firmly believe that's technically incorrect. Once you are TARGETED, then you will forever have a crosshair over your head. Everybody's device is already infected, from the factory. It just needs to be activated. That's what I've been saying since before May 26th, 2020. -__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--09:12 - NSO Group declined to be interviewed for this project. Publicly, the company has insisted that it "does not operate the systems it sells", and that it investigates "all credible claims of misuse" by its government clients. So, on an official basis, this disclaimer is essentially: [NSO Group]: We're not liable nor responsible for any of the shit that our clients do. By the way, fuck you. And your mother. Bye. 09:31 - I can tell you on the last 10 years, we only found (3) cases of misuse. (Sounds like total bullshit...) We have all the mechanisms to ensure that they are not misusing the systems. (It's either bullshit, or someone reverse engineered their software, or both) 11:22 - The main task for us and for all the partners was to identify the names behind the phone numbers.

```
Wanna know what is MORE IMPORTANT THAN THE PHONE NUMBER...?
Uh, the (serial number/IMEI number/mac address) of the device.
All of them are a UNIQUE IDENTIFIER which goes beyond the phone number.
They're literally printed into the physical components of the devices' logic board, or more specifically,
the (NIC/network interface controller).
Whether that's for the cellular radio, wifi radio, or bluetooth radio, really...
...having the unique number for the device can be derrived from each of those numbers if the surveilling party
has access to the device manufacturer's engineering overview.
You throw in any of those details as if you were trying to get service enabled on a particular device...?
And then BOOM. Then you have the service provider, device type, et cetera.
Who would have this information...?
Uh, the device manufacturers would definitely have them...
The first (6) characters of the MAC address point to the company in question.
The service providers (Verizon/Bell Atlantic/AT&T/Sprint/T-Mobile/etc.)
The insurance carriers (Asurion/etc.)
The operating system manufacturers (Google/Apple)
Maybe even a BUREAU that would INVESTIGATE something on a FEDERAL level. (FEDERAL BUREAU OF INVESTIGATION)
Maybe even an AGENCY where SECURITY is a NATIONAL thing.
                                                                        (NATIONAL SECURITY AGENCY)
Maybe even an AGENCY where INTELLIGENCE is saved to a CENTRAL location. (CENTRAL INTELLIGENCE AGENCY)
Maybe even a DEPARTMENT where SECURITY is a HOMELAND operation, all the time (DEPARTMENT OF HOMELAND SECURITY)
Lots of fuckin' places where this information could potentially be...
Might even store this information in a huge CLASSIFIED DATA (LAKE/BASE).
Like, one that's right next to a STATE CAPITAL, in like, Idk, Utah or some shit.
Comprehensive National Cybercommando Intiative [Task Force] Command Center.
Here's a document about (Saltstack/the Utah Data Lake)...
{\tt https://github.com/mcc85s/FightingEntropy/blob/main/Docs/2022\_0819-(Introduction \% 20 to \% 20 Salt \% 20 Stack).pdf}
All of those places I just listed MAY HAVE THAT INFORMATION...
Just to be CLEAR here, the phone number is relatively fucking meaningless.
It would just serve as a point of entry for intial reconnaissance.
But the point I am making, is that THE PHONE NUMBER ISN'T EVEN NECESSARY TO TARGET A PARTICULAR PERSON/DEVICE.
| Q : How would YOU know that...?
 A: Well, when I first saw Edward 'Don't fuck with me, bro' Snowden's NSA leak...?
 I began to suspect that some people were pulling some shady trollmeister 5000 action all across the board.
 _______
 Q : Shady trollmeister 5000 action...?
 A: Yeah, shady trollmeister 5000 action. All across the board.
 It's when some fuckin' highly respected clowns go around thinking they're not gonna get caught doing
 something 1) shady, 2) stupid, 3) illicit, or 4) trollmeister-like.
 For instance, lying to people and expecting that nearly everyone is going to believe what they're told, as
 long as those people hold a high position in society.
 That's the shady trollmeister 5000 action, unpacked and examined for ya.
 Now multiply that by any number higher than 10, and it might be pretty accurate.
 I like to use the number 5000 to characterize how fuckin' stupid and obvious it is.
 ______
 Q : That's a lot of shady trollmeister 5000 action goin' on...
```

[About lving]

A : Indeed.

Every person lies. Every company lies. Every president or person in the government lies. Every police officer lies. Every teacher lies. Every body fucking lies. Nobody has ever been 100% honest all the time, at all times...

100% of every single person that has ever been BORN and DIED, who has spoken at least (1) language, has

That's because everyone that has ever lived, has lied at some point in their lifetime.

| learned how to LIE to other people. Nobody can stop it, either.

...and that's why when people say "But that person said this other thing..."

I will say "Did you know that's called HEARSAY...?"

And then they'll be like "I don't know what that word is, and I don't care."

Boom. Case closed. That's how I know for CERTAIN, WHEN and WHERE to identify: STUPID PEOPLE. I will say "Well, it means that you're a fucking moron to call that HEARSAY, FACT..."

Because that's when people rely on the PEOPLE they know, rather than SHEER PRINCIPLE, in order to understand the SCOPE/SEVERITY of a POTENTIAL SCANDAL.

People lie. They don't ALWAYS LIE, but LIE RATIOS can be CALCULATED by EXAMINING PEOPLE'S BODY LANGUAGE and PSYCHOLOGY in response to SPECIFIC QUESTIONS, and MOST PEOPLE cannot tell when someone lies.

I can tell pretty fucking easily when anybody lies.

Typically, anytime a CEO is being grilled by CONGRESS or the SENATE JUDICIARY COMMITTEE...? That CEO is basically 75% lying to people that whole entire time.

For instance, MARK ZUCKERBERG/CAMBRIDGE ANALYTICA. CENSORSHIP. Things like that.

At which point, people really trust someone highly respected like GWB, Trump, Dorsey, or Zuckerberg...
...and they'll be like:

/--__/

[Somebody]: Yeah right, dude.

That person is TOO highly respected to EVER lie to ME...

So, fuck you, chum.

You're wrong.

They would NEVER lie.

Ever.

That's just the way HUMAN PREDICTABILITY goes, scandal after scandal... All the time.

Lots of people just GASPING~! whenever they hear about someone or some company they respected or thought were TOO PERFECT TO LIE... having been found, lying.

Because that's when I have to whip out the big guns and say "Told ya so. Remember when I accused some really important person YOU trusted, of being a deceitful lying cuntrag...?"

Then people that were wrong that whole time will try to begrudgingly pretend as if it was stupid when I said it. Nah, sometimes the person who's REALLY stupid, is the person who was WRONG that whole time, and ignored someone like ME, who was CORRECT that entire time.

It's the height of human stupidity.

If you live life expecting that people will use their POSITION or PERSONALITY to escape TOUGH QUESTIONS...? Then you can PREDICT those behaviors, and PLAN for them ahead of time. Then, record them.

Then, show other people the recordings.

Like when Josh Hawley grilled Mark Zuckerberg for basically lying under oath.

When people say:

"OoooOOoohHHhhhhH but I heard a lot of people say this stupid thing..."

When people hear some STUPID THING that doesn't have any ASSOCIATED EVIDENCE, that shit is called HEARSAY. Even the police are highly skilled at confusing HEARSAY as FACT. So are some judges. And lawyers. And doctors. And teachers. And a bunch of other fuckin' people too.

Sometimes, ASSOCIATED EVIDENCE that would normally override NON-EVIDENCE is IGNORED by the government, media, police, etc.

For example, the NIST 9/11 report, and the strange case of Robert Korol.

But also, "an audio recording of a conversation between my mother and I that was uploaded to my Google Drive at 1:02PM 06/28/22, that I told Cameron Missenis, Sergeant Bosco prior to an unlawful arrest they made on 06/28/22", the police and court system will work REALLY HARD to IGNORE THAT EVIDENCE, in order for them to look like they told everybody the cold hard facts.

That's STILL called "HEARSAY", and it's what so many people rely on in order to have an understanding of reality. It's called "HEARSAY" because ignoring CRITICAL SUPPORTING EVIDENCE is what homosexuals with badges and gavels typically do. Maybe even your Aunt Nancy and Uncle Rick Smith.

It's the height of human stupidity.
"Hearsay" and "Fact"...? They're (2) totally different terms.
Facts don't give a flying fuck about your feelings.
Facts will tell your hearsay to get the fuck out of the way...?

The facts are more reliable than what people fucking say. Doesn't matter WHO that person is, either.

12:20 - Claudio Guarnieri is the head of Amnesty International's Security Lab.

He worked on creating a methodology, a platform that we could use during our investigation to have phones analyzed. He's a key element of that investigation.

12:40 - (editing some python scripts in EMACS on Linux, and some json)
Without his expertise, nobody in our team would have been able to detect traces of Pegasus in a phone.

/--__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--

That might be correct. However, there are ways to detect remote entry software, whether that software is PEGASUS/PHANTOM, or otherwise. Here are some ways to do that...

- 1) If the device is acting more SLOWLY than USUAL, or is otherwise acting UNRESPONSIVE...?

 That is not ALWAYS an indication that the SPYWARE is there, however, it is a GOOD FIRST SIGN.
- 2) If the device occasionally does something erratic without user interaction, that is ANOTHER INDICATION that the spyware is there, though not exactly CONCLUSIVE.
- 3) If the person using the device uses it to type notes, record audio/video, or take pictures, and there appears to be ARTIFACTS or ALTERATIONS to the content of those files...? That is an ADDITIONAL INDICATOR. Typically, if you were to take dozens of CLEAR AS DAY pictures, and then SUDDENLY, after speaking to ERIC CATRICALA on 05/24/20 at about 7:00PM at 1597 US-9 Clifton Park, NY 12065, the PICTURES and VIDEOS you take AFTERWARD are BLURRY and stuff...?

That's actually a really clear fucking sign that someone is using remote software.

The Saratoga County Sheriffs Office won't have a single officer on staff, that can address that fucking issue if you have that level of interference. Not at all.

4) Sometimes remote interactions will appear to be hidden alongisde a POPUP, or sometimes the AUDIO LEVEL will be reduced and it'll say "OooOOohh, listening to stuff at the maximum level can damage your hearing, we automatically turned it down for ya. Don't be a douchebag. Protect your hearing and stuff."

It won't literally say that, but the device may adjust the sound volume in RESPONSE to the CONTEXT of the audio file or video CURRENTLY being played on the device. Though, a MALICIOUS INTRUDER won't want to raise the awareness of the user... a BENEVOLENT GUARDIAN/PROTECTOR may do this, to communicate with someone.

5) If you were to UPLOAD some of the content you've recorded, taken pictures of, and there appears to be something INTERRUPTING your progress of uploading stuff to the internet or a Google Drive account...?

That is about the most direct indicator possible, that someone is performing a MAN IN THE MIDDLE ATTACK, and that there's probably a homosexual involved.

6) If you record a video like THIS...?
05/24/20 | Pegasus on my Apple iPhone 8+, error message when attempting to extract files ~! Oh no ~! https://youtu.be/i88AJb_5zY4

You may have been attempting to EXTRACT FILES FROM THAT DEVICE.

But— a HOMOSEXUAL with REMOTE ACCESS SOFTWARE such as PEGASUS, was interrupting the process involved, in exfiltrating files from that particular device. Whether that's through PROCESS INJECTION, or just doing something to the INTERFACE between DEVICE #1 (iPhone 8+) and DEVICE #2 (Asus Q504UA Windows Server laptop)

It's almost as if these (6) things combined, prove very reliably, that I may have been a subject of a program called "PEGASUS/PHANTOM", and that I said that about 9,000 fucking times...

But- some morons constantly undermined my intelligence.
They are NEVER going to AGREE "Well, MAYBE I made an oversight after all..."

So, that's why it's important to RECORD PEOPLE WITHOUT THEIR KNOWLEDGE, (saying/doing) the dumb shit that they do. Here's an example of someone really important, audibly admitting that they were really fucking careless about something...

04/06/21 | Family Court - Judge Paul Pelagalli https://drive.google.com/file/d/1J0CzIlnW5xwmWbwUVw0EMbhLUiZYEr4p

And then... show other people how stupid they (look/sound) after the fact. They won't really care for that...? But, if they didn't do the stupid shit they got caught doing, to begin with, then they wouldn't need to be exposed at all. I was sentenced to (20) days in the Saratoga County Jail for making that audio recording.

Wanna know how fucking stupid that is...?

\$285 * 20 = \$5700.00 that I am owed, for each day that I was unjustly incarcerated for someone who calls themselves a fucking judge, ordering me to go see (2) doctors that don't even work at the fucking place he ordered me to go to. (to which I was already a patient of that clinic, and stated that in the virtual appearance where he originally wrote that order... "Yeah, I'm already a patient at that clinic...")

```
\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--
```

12:49 - It's a piece of code that look very similarly to all the others that you are running on your phone, and it's just designed to do something that it shouldn't.

```
"type": "bundle..."
"id": "bundle--1c6e54ef-72..."
"objects": [
   {
        "type": "malware"
        "spec_version": "2.1",
        "id": "malware--3dbf9242-c9d7-4cc0-aa96-1b8782e6458a", # <- ?
        "created": "2022-02-17T11:20:12.830316Z",
        "modified": "2022-02-17T11:20:12.830316Z",
        "name": "Pegasus",
        "description": IOCs for Pegasus",
        "is_family": false
   },
    {
        "type": "indicator"
        "spec_version": "2.1",
   }...
1
```

12:57 - Pegasus accesses files on the device, accesses the records on the device, being from WhatsApp, being from the SMS database that you have on the phone.

(SMS database means text messages SENT and RECEIVED)

 \dots or access the GPS of the device, record the audio, access the webcam. These kinds of things.

13:17 - Apple and companies like it try to create as many layers of complication as possible for an attacker.

But the unfortunate reality is that against capabilities like those that Pegasus customers have, there's not much you can do from a digital security perspective.

You cannot stop them meaningfully, you can only try to make it more complicated.

```
\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\__/--\
```

So, there you have it. An actual bonafide security researcher from Amnesty International's Security Lab, basically saying the equivalent of... "Everybody's fucked, bro. Nothin' anybody can do... Bye."

There is something people can do to stop them meaningfully... It is called EDUCATION and EXPOSITION.

Educating people that the attackers are out there, and they'll never stop trying to engage in hostile attacks against other citizens agencies or people. And then, exposing people who continue to try and hide the illicit shit that they're doing, and make them look really fucking stupid, repeatedly. That's what people can do to meaningfully stop attackers from doing this shit.

<Here's a thought experiment regarding the existence of this software/technology>

[Person 1] doesn't think shit like Pegasus exists, nor believes that their phone, social media accounts, email, bank account, etc. could possibly be hacked, since they're WICKED IMPORTANT, and they own a lot of shit.

[Person 2] KNOWS that Pegasus exists, and believes that ANYTHING could be hacked, and isn't an oblivious fucking dumbass about it either, and so, they don't take chances and believe what they're told by mass manipulators and liars.

[Person 1] eventually gets blindsided by attackers that WERE stalking them and their behaviors, and those ATTACKERS just so happened to be the foreign intelligence service. [Person 1] gets killed, and goes missing.

The local police start looking for them, but they don't put a lot of effort into it because that's really complicated stuff. So, they settle for filing a MISSING PERSON REPORT, and then they throw their hands up and say "What can you do about it, really...?"

Then, the missing (murdered) person is never ever found, since the body was hacked up by private military contractors, thrown into suitcases, and taken with them over a very prestigous airline like <insert airline>... and then all traces of that oblivious idiot are fuckin' gone.

[Person 2] occasionally leaves their device somewhere whenever they notice strange characters following them around in a blue truck after recording audio logs like "Live_Redaction_Program" where a person talks about [xKeyScore].

[Person 1] just winds up (missing/dead), and while the police tell themselves that they're really thorough...? They'll NEVER have a fuckin' clue that [Person 1] was actually a target of a (foreign intelligence service/spies).

[Person 2] knows that is a possibility, and thus, it's much harder to trick someone who isn't a total moron.

Thinking about these <thought experiments regarding the existence of this software/technology> is pretty smart. That is really the only way to MEANINGFULLY STOP ATTACKERS. But also, use PEN and PAPER to distribute info.

The internet is a TOOL as well as a WEAPON OF MASS DESTRUCTION. (ARPAnet/the Internet) was ORIGINALLY DESIGNED BY THE MILITARY, TO BE A WEAPON.

- 14:08 For years we heard rumors about the Pegasus spyware might have been used on [Jamal Khashoggi], who was killed in 2018 in a consulate of the Saudi's in Istanbul.
- 14:28 The minute we found out about this list, the first thing we all did, was to check for any numbers related to Jamal Khashoggi, or anyone we knew who was associated with him. And right away we found (2) numbers...

*** suspenseful, high intensity drum roll ***
...associated with the (2) women closest to him in his life.

*** Gasp ~! ***

Uh-oh. Women being involved in spy-type shit...? No fuckin' way, dude.

So, was [Jamal Khashoggi] killed by (his lovers/these women)...? OR... were those women <targeted> by some [shady trollmeister 5000] action...?

Nobody may ever know.

Oh, wait.

Nah hang on...

14:55 - [Jamal Khashoggi]'s murder, really in the history of the post, stands out.

He was an OPINION WRITER for the WASHINGTON POST. (Journalist, much like [Julien Assange]) Very gentle, soft-spoken man. (much like [Julien Assange])

His voice became very important... (much like [Julien Assange])
...because he was the single most important dissident... (much like [Julien Assange])
...writing about the Saudi regime. (not EXACTLY like [Julien Assange])

[Mohammed Bin Salman]: Crown Prince of Saudi Arabia (somewhat of a [shady trollmeister 5000] extravaganza)

Uh-oh. That's why the SECOND AMENDMENT is pretty important. Because if this dude tries to send some of his henchmen over to America to take out journalists expressing their FIRST AMENDMENT rights...?

Then, this dude could literally send a death squad, all paid to fulfill a (PMC/private military contract), to EXECUTE a specific target.

Or really, ANY (prince/leader) of ANY country, could be using (Pegasus/Phantom) to target ANYBODY, ANYWHERE, and then have them KILLED for having an OPINION that would serve to UNDERMINE their POWER.

So, if I make fun of [Mark Zuckerberg] from [Facebook] for leaking information to [Cambridge Analytica]...? He could very well hire a PMC cleanup crew as well, and even CENSOR ME on the platform, in order to make it possible, for people to not hear a single fuckin' word I say about my suspicions.

Though, to be clear, I don't think anybody thinks I'm on [Jamal Khashoggi]'s level yet. I think, if anything, my language is FAR MORE MANIPULATIVE than his was.

16:18 - They dispatched an assassination team (PMC/private military contractors) that landed in a plane in the airport and came in cars with tools to hack him up, hack his bones, and carry him out in a suitcase or suitcases. ** scoffs **

__/--\

That's right, ladies and gentlemen.

Anybody of any sufficient POWER LEVEL, can purchase this fucking program, to assassinate someone with an OPINION that they don't particularly fucking care for, and then... pay (PMC/private military contractor)'s to come along, and just... lay total fuckin' waste to somebody who's not suspecting a team of highly trained soldiers...

...to barge in, slice their throat, and then gut them like a fish, cut them into pieces, and then carry them back out of the country in suitcases.

Extremely clean, extremely professional, and now the person just goes missing and is never fuckin' found. That's the (power/danger) involved, in this fucking program. [Pegasus is international/Phantom is US-based].

(NYSP Trooper Borden + SCSO Clayton Brownell) won't be able to have a conversation with me long enough at GT Toys about this program, like, back on (June 17th/18th), 2020, to realize that the people Borden called that day, at the Federal Counterterrorism Intelligence Agency...?

APPARENTLY, they had no idea that I had a fuckin' device in my god damn hands that had traces of this fuckin' program on it, and it still hasn't been formatted or anything. THEY told Trooper Borden "We don't have a program that can remotely access a particular smartphone or anything like that..." But, that was total bullshit. Oh nos.

/-_/-_/-_/-_/-_/-_/-_/-_/-_/-\

03/24/19: (CBS 60 Minutes/Lesley Stahl), (Shalev Hulio/CEO of NSO Group)

16:52 - The word is that you sold Pegasus to them, and then they turned it around to get Khashoggi.

17:00 - Khashoggi's murder is horrible. Really horrible.

Expressing acknowledgement, the expression illustrates the notion that he believes what happened was a grotesque murder after all, however- it does not take ownership over the notion that the tools were reverse engineered or otherwise tampered with.

That's the danger involved in keeping ZERO DAY VULNERABILITIES undisclosed. Frankly, the words fall flat on me.

The company's existence is to sell its software for a profit. That's the beginning and the end of the conversation.

They DO have something to do with the murder (though indirectly), regardless of how they FEEL about it.

It's a lot like saying that (Smith & Wesson/Armalite/Ruger) had nothing to do with the people being murdered in Las Vegas by Stephen Paddock. Yeah, the weapons manufacturers may not have had anything to do with the MURDERS...?

But, THEY MADE THE FUCKING WEAPONS THAT HE USED TO COMMIT THE MASS MURDER. Basically, at this point, the rest of the documentary is going to cover some shit that I've already discussed at length in my book.

Top Deck Awareness - Not News
| Used to be news...? Now it's Not News. Not News. Part of the Not News Network
| https://github.com/mcc85s/FightingEntropy/blob/main/Docs/2022_1008_TDA_Not_News.pdf

The title says it all.
Used to be news...?
But at some point, it stopped being news.
That's when it became Not News.

At the direction of Tucker Carlson, Sean Hannity, Ted god damn Cruz, and Rupert Murdock...?

NOW, there's an entire network of negative Nancy's neglecting and nullifying the notion of noteworthy news...

...leading an entire nationwide industry of distributing nefarious non-newsworthy news.

That's the Not News Network for ya.

Here's a synopsis for the book, Pegasus/Phantom, as well as many national surveillance programs in general...

For the government or people to go around, gallavanting as if they had no fuckin' clue that some shady trollmeister 5000 action was goin' on that whole time...?

That's pretty fuckin' stupid.

There's ALWAYS some shady trollmeister 5000 action goin' on.

It's a lot like saying that the Central Intelligence Agency had NO IDEA that Osama Bin Laden would EVER try to attack the World Trade Center again, like he did in 1993.

Nah, I'm pretty sure that some people in the Central Intelligence Agency, as well as Exxon Mobil, had an idea that Osama Bin Laden was bound to attack the World Trade Center.

Thus, that is why SOMEBODY went ahead, and installed rods of thermite and explosive packages in the (3) buildings that collapsed on in Manhattan, on: Tuesday September 11th, 2001.

The (media/Shayam Sundar/NIST) told this tale as if the airplanes are the reason why those buildings fell. Prior to WTC 7 collapsing due to controlled demolition, IT WAS PLAUSIBLE THAT THE (2) TOWERS COLLAPSED DUE TO THE PLANES. AFTER WTC 7 COLLAPSED, IT WAS AS IF SOMEBODY WAS FOUND WITH A HUGE DICK IN THEIR MOUTH...

Yeah. WTC 7 supposedly collapsed due to DIESEL FIRES.

That's about the dumbest fuckin' thing I've ever heard in my entire life.

(2) airplanes struck the (2) buildings, but no THIRD airplane needed for the THIRD building.

THIRD building falls in nearly an IDENTICAL WAY, as the other (2)...?

Basically a living embodiment of somebody-caught-with-a-dick-in-their-mouth, the only question is WHO...?

Well, Larry Silverstein had a fuckin' clue alright.

Some of the "ELITES" knew that shit was gonna happen, and they PLANNED FOR IT.

Then, Robert Korol, a civil engineering (expert/professor) who spent his entire fuckin' life engineering and demolishing buildings, he's gonna have a serious fuckin' problem with the NIST 9/11 report since it excludes so many factors about the controlled demolition that the (3) buildings were subjected to on 09/11/2001.

But- that is a rather long winded explanation. I shorthand it to being a real "dick in the mouth" situation.

Also, a cruise missile or ICBM or whatever, is what flew into the fucking Pentagon that day.

No fuselage was ever found at the fucking scene.

Somehow, NOBODY was ever found of being a complete fuckin' moron... (apparently)

Anyway, (conspiracies/realities) aside, check this out.

Somewhere between the possibility of INDIVIDUALS in the government knowing shit like that ahead of time... ...to them (not knowing a god damn thing after all/being blindsided)...?

Exists a SPECTRUM between (George Orwell's 1984/Minority Report)...

...and just a bunch of oblivious fuckin' idiots walking around, having no god damn clue whatsoever, what the fuck is goin' on, any given day of the week.

America isn't a place where people never have a fucking clue of what the fuck is goin' on, nah.

America is a place where you can be god damn certain, SOMEBODY's gonna see some shit happening ahead of time.

19:08 - [Conversation between Dana/Claudio]

-. . .

The new one seems clean.

The old one has traces on the 6th of October 2018, seems to have been a first compromise.

Which was followed by some additional traces on the ninth, and then on the 12th.

There is also an additional record in June of 2019.

But that seems to be probably a failed attempt.

And I don't see anything following that.

19:52 - The analysis proved that the phone belonging to [Jamal Kashoggi]'s fiancee had been infected with Pegasus.

Then we find out the date, which is (4) days AFTER his murder...

 \ldots when she's still trying to figure out what's happening.

20:12 - And it just seemed like such a BALLSY MOVE...

 \dots to surveil the person who has become the public face of his disappearance.

Yeah, that's how they do it.

They do things that are incredibly ballsy, they don't care how OBVIOUS or BLATANT their actions are...? Because they're fucking morons.

THEY do not believe that they're morons.

But that is how being a moron typically works.

/--__/

[Bill Marczak/Citizen Lab]

22:32 - What I did, is I analyzed ALL of the available data on (2) Android phones, and (1) laptop belonging to [Hanan].

On (1) of the phones, it appears that there were (2) separate links to the Pegasus spyware that were actually opened.

voice fades

22:53 - Before [Jamal]'s murder, [Hanan] had been detained and interrogated in the [United Arab Emirates], which is of course a close ally of [Saudi Arabia].

23:03 - They took me to a office in the airport.

Then they took me to my house.

They searched the whole house.

They take my devices, my family devices.

They have the password.

I was in investigation for 17 hours, until I got tired, I slept on the floor.

23:22 - What [Bill] discovered, was when she was detained at the [U.A.E.] airport, somebody who took her phone, then opened a browser on her phone, and then typed in a URL that then directed the phone to a website known to [Citizen Lab] as being a Pegasus website that activates the infection.

So, at some point in April 2019 when I was in Bennington VT at: 514 Main Street, Bennington VT 05201, I attempted to visit a website... fakebook.com...

...and then suddenly a thing downloaded to my device which was like idk, less than 12 kilobytes, I believe...
...I was pretty sure that it was some sort of infection, though to be clear, I didn't have the knowledge to investigate it further. That's how easy it is for these people to distribute malware that "ACTIVATES" this shit.

/-_/-_/-_/-_/-_/-_/-_/-\-/--_/-\

23:49 - The link to Pegasus was actually typed into the web browser character by character.

They made a couple of typos actually while they were doing it, which tells me it was done manually.

24:02 - We have the smoking gun from [Hanan]'s phone, which is the traces of the spyware.

You know, almost certainly the spyware was installed and exfiltrated information from, from her phone.

So she was, in my view, monitored.

And there ya have it. Concluding that somebody's being monitored is just half of the battle.

Suppose that you're like me, right, and you make a video like I did on MAY 25th, 2020, where I'm standing right outside of 10 Innisbrook, Clifton Park NY 12065, and I walk all the way from THERE, to the Clifton Park public safety building, to the Shenendehowa Central School District campus, where my phone dies.

IMG_0627 | 05/25/20 1054

https://drive.google.com/file/d/1zhiwa9hvh5Lg58gHTjDT9TpM0k6NRZVx

And, in that particular video, I state in front of the entrance to the NYSP barracks:

"I know that I don't even have to hit the buzzer, and you people can hear every word that I'm saying..." (because I knew that the program was already on my device) and then... then, LATER THAT NIGHT...?

...I fuckin' record a video of a couple shady trollmeisters that are former customers of Computer Answers, using this fuckin program to monitor ME...?

Uh oh.

I had a SMOKING GUN on my device.

I even showed it to my kids as well as NYSP Trooper Shaemus Leavey on 05/27/20.

But- there's some fuckin morons in the state of New York that haven't accepted that quite yet...

Someone tried to kill me with this remote software... and they fuckin' got CAUGHT using it, and they attempted to kill me, and [Scott Schelling] asked me about the "SECOND CELL PHONE" that I suggested I had, into the microphone, at the intersection of Route 9 and Route 146, after (2) shady trollmeisters in these (3) pictures...

IMG_0649 | 05/26/20 0011

https://drive.google.com/file/d/1W0234ojNChSpwDZWnWPzjjZRBQ2CQm0L

IMG_0650 | 05/26/20 0011

https://drive.google.com/file/d/1vu2bhSSCv2HO-HCeCCh5-iqcYpiiqC2l

IMG_0651 | 05/26/20 0011

https://drive.google.com/file/d/limYzaTA--eVDMeSM-dHfYBfC2tiAHsLV

Uh-oh

That's a smoking gun that some of the cops at the (SCSO/NYSP) were too lazy to check out. What I can say is that the local police had some units that were monitoring me for "my" protection...

So, if you're investigating someone abusing surveillance tools, they'll want to assign a unit to monitor YOUR activities, THAT WAY, they can try and quietly kill you, should you stumble across something that looks incredibly illegal.

Oh nos.

[07/21/1989] (Michael Edward Cook/Jesse Pickett)

https://drive.google.com/file/d/1y05kPm-CjVIALi6r8CNPMlIRnXvMtPpD

[XX/XX/1992] (Nfrastructure Corp.) registration

__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--__/

There isn't a smoking gun anymore, not unless I'll be able to exfiltrate the video that I recorded between (05/25/2020 2343 -> 05/26/20 0004) on my Apple iPhone 8+ that was DISABLED after I showed that fucking video to NYSP Shaemus Leavey on 05/27/2020. Because, whoever made the mistake with Jamal Khashoggi, leaving traces of evidence behind for guys like (B. Marczak/Citizen Lab), or even (C. Guarnieri/Amnesty Int'l SL) to DETECT and then FORENSICALLY ANALYZE...?

Nah. They thought ahead, and that's why my device was disabled on the same day that I showed Trooper leavey that video. Somebody's been taking a long ride on easy street, never being detected killing unsuspecting (victims/targets). They attempted to pull a fuckin' fast one on ME, right...?

Who knows if the trajectory I've suspected above, is accurate. Really, if anything, I've only learned that sometimes the LACK of PROFESSIONALISM from the POLICE, may be an INDICATION of FACILITATION.

If I were an OFFICIAL INVESTIGATOR working for the government, I would already have established that I work a lot harder than the actual investigators in the area, because NONE OF THEM, have asked me any fucking details about the murder attempt that I claim to have occurred, on 05/26/2020, leading to incident:

SCS0-2020-028501

https://github.com/mcc85s/FightingEntropy/blob/main/Records/2020-028501%20Cook%20req.pdf

Cause, the caller claims that I jumped in front of their vehicle. The caller would not make a claim that they attempted to strike me with their vehicle. Not at all. That would be pretty stupid, for a caller to do...

To be clear, the caller in that incident may not have been the fucking morons who tried to run me over, twice.

/--__/

Caller : Yeah, I just tried to run over some dude near Burger King and Keybank.

SCSO : Did you get him...?
Caller : Nah, couldn't get him.

SCSO : Well, wtf dude...

Thought you were an expert, or whatever...?

You sound more like Fail Boy 5000.

Caller : LOOK BRO...

What do I look like, the fuckin' answer man or whatever...?

SCSO : Idk, I can't see ya...

Caller: Look, we couldn't get him.

We had our car parked in the Lowe's parking lot, and tried to run him over before taking a right onto route 9, headed north, at about 01:00 AM, 05/26/20.

SCSO : You had your car parked in the Lowe's parking lot...?

Caller: Yeah, that's right.

SCSO : I mean, who doesn't park their car in the Lowe's parking lot before they attempt to commit a vehicular

homocide...?

Caller: I don't know, but there's NO WAY that this guy uploaded ANY EVIDENCE of us attempting to do so earlier, between 10:45 and 11:15 PM near Center for Security.

| 05/25/20 2300 | Audio Log - Computer Answers https://drive.google.com/file/d/1dmTkiCzgyGwG9g5B09hIn_SSeFWPcrIs SCSO : So, there's no way that this dude you tried to run over twice, uploaded this file...? | 05/25/20 2300 | Audio Log - Computer Answers https://drive.google.com/file/d/1dmTkiCzgyGwG9q5BO9hIn_SSeFWPcrIs ...at like 05/25/20 @ 11:29 PM from the [Computer Answers] network... ...configured with a [Cisco Aironet 1142N] Wireless Access Point... ...that this guy purchased from the [Nfrastructure Corporation] back in December 2017ish... ...who then configured it in May 2018 when he was working for the [Asurion] contract and [iFixUrI]...? ...since he used to be the manager of that [Computer Answers] shop? Caller: Nah, not a fuckin' chance, bro. There's NO WAY at all. : So, he didn't take these pictures which could be used in an investigation...? | IMG_0636 | 05/25/20 2329 | https://drive.google.com/file/d/la-lb9MOUKi1wy9c4cEEyuclH_rQIMhNo IMG_0637 | 05/25/20 2329 | https://drive.google.com/file/d/1ZNmufDVX7Xkvf4pHq0fPk2Ww2tvkwGCL IMG_0638 | 05/25/20 2329 | https://drive.google.com/file/d/luIxufETfzgpM1uLp9mclF4quMkWak4LY IMG_0639 | 05/25/20 2329 | https://drive.google.com/file/d/1EL_JllhbHWTkYTPAm595SxjhMyRF5vKP $IMG_0640 \ | \ 05/25/20 \ 2335 \ | \ \underline{https://drive.google.com/file/d/1V_GJJvpxrxleMcMYuf1ZrwDcxg8XvD3h}$ IMG_0641 | 05/25/20 2336 | https://drive.google.com/file/d/1g-t0e4lBQcKaip8ZaHGg7lQm0F7ufSDS IMG_0642 | 05/25/20 2337 | https://drive.google.com/file/d/1e_KKi6oMfJcqQSLtXCIwES9jKShaK8Vf IMG_0643 | 05/25/20 2337 | https://drive.google.com/file/d/1GYlnixSrS-_C4BY04zx__I4LznrIFJjU IMG_0644 | 05/25/20 2337 | https://drive.google.com/file/d/lje8w77DYiUosmS5G3L-40RgGG1ve7ahI IMG_0645 | 05/25/20 2337 | https://drive.google.com/file/d/1TIuFj7RcyWtADqpSYavDpP9UcdlyHNvA | IMG_0646 | 05/25/20 2343 | https://drive.google.com/file/d/1Lb8RLYUsJnnKnTOHbunlyBmidIXycjVD |

Caller: Not a fucking chance, dude.

The captains' kids that live off of Farm to Market Road, or not...?

We're not taking any chances.

We just wanted to let you know, this dude is MAD suspicious.

Just passed him in front of the Zappone dealership.

There's NO WAY that [Robert Missenis] was in his black Infinity Crossover, either.

SCSO : Not at all, eh...?

Caller : Nope.

What YOU need to do, is get [Scott Schelling] to the Zappone dealership, ASAP, and arrest this wild

menace either BEFORE he gets himself killed, or AFTER.

SCSO : Alright, we're on it.

And that's how fuckin' moronic the investigators at the (NYSP/SCSO) truly are.

For instance, [Michael Zurlo], [Jeff Brown], [Shelly Zeitske], [James Leonard], and a bunch of other people.

Now, are they ALL moronic...?

Probably not.

If anything, maybe some of them are just terrified of even touching this case, and they quiver at the butthole in total fear, anytime they hear my name, or about this case. Because, they know... if they investigate this case at all, even SLIGHTLY...?

Someone in their agency may just pull the same shit that they did to my father back on 10/23/1995, and Santa "Sammy" Cassaro on 08/01/1996.

Weird thing is, [Francine Vero] was a key witness in [Sammy Cassaro]'s murder trial when she was 16-18 years old. She's CURRENTLY, (42ish) Honorable Justice [Francine Vero], and there's NO WAY that she'd be involved in ANY of this shit, nor would she have been involved in a document I wrote back on June 17th, 2020 prior to some bitch named [Laura Hughes] from the [Saratoga County Childrens Protective Service], like, failing to look at the shit in that exhibit list. That's like a FULL DAY before this bitch wrote a "fraudulent letter of indication."

Now, as far as [Francine Vero] is concerned, even if she was the judge involved in the [PRECISION PERIODONTICS] vs. [COMPUTER ANSWERS] lawsuit back in August 2019, it's OBVIOUSLY just merely COINCIDENTAL.

Lots of COINCIDENTAL incidents.

In order to REALLY investigate some shit, you NEED a smoking gun, not just MOUNTAINS OF COINCIDENTAL SHIT. Thousands of coincidences occurring isn't SHADY nor SUSPICIOUS in the fucking least.

Not at all.

And, if you're as (smart/fucking stupid) as the people who tried to kill me...?
You'll have a way to disable a target's smartphone BEFORE they record something like this...

| 05/24/20 | Homosexuals performing a MAN IN THE MIDDLE attack | https://youtu.be/i88AJb_5zY4 |

Now, it certainly LOOKS as if the Russians may have targeted me, but then again...
...it really could've been someone else that severely underestimated me.
Maybe it was (Bell Atlantic/Verizon/Spectrum/etc.)
Or, whoever I was talking about on Facebook between 01/11/2019 -> 05/26/2020.

Whoever it was...?

They thought that it would be COOL, to attempt to murder ME, in a SIMILAR FASHION TO HOW MY DAD WAS KILLED. And, they really were (stupid/ballsy) enough to think I wouldn't see that shit coming.

There's that WORD again... "ballsy".
Ballsy sometimes means that someone is really fuckin' stupid, and that's it.

Some people won't see the sense in some of my social engineering strategies. The fact of the matter is that I don't really care about how people in the general population PERCEIVE me, because...? Only eagle eyed people will understand my motivations, and most people aren't that astute after all.

Few people seem to understand what being the son of a murder victim leads to. https://github.com/mcc85s/FightingEntropy/blob/main/Records/SCSO-2020-028501-(EVIDENCE).txt

25:04 - Saudi Arabia has said claims that it used spyware are 'baseless'.

The United Arab Emirates denied it was involved in surveillance of Hanan Elatr.

In other words, they're basically saying 'Go fuck yourselves, you're fuckin' stupid.' Now, are they ACTUALLY saying that...?

No.

But, typically, people that BASICALLY say 'Go fuck yourselves, you're fuckin' stupid'...? They're going to DO such a thing with their ACTIONS, rather than their WORDS.

Their words will... SOUND WARM, CARING, & EMPATHETIC and CONSIDER the EVIDENCE Their actions will... FEEL COLD, UNCARING & CALCULATING and CONTRADICT the EVIDENCE

This is the hallmark of (stupid + predictable) people.

It's exactly like when some dude gallavants as some straight dude married to a girl, but occasionally goes and sucks another mans dick.

That's exactly what this disclaimer says, believe it or not, at least metaphorically.

Because, when that dude is caught in his own "DICK IN THE MOUTH" situation, what do you think he's gonna do...?

I'll tell ya. That man will stop sucking that other dude's dick mad fast, and then say: "THIS ISN'T WHAT IT LOOKS LIKE~!"

Whatever you say, buddy.

Sometimes, when you have some other dudes dick in your mouth...? ...that's just a classic case of being EXACTLY what it looks like.

What it looks like, is that you're a 1) liar, and 2) LITERAL cocksucker, but- "Lying cocksucker" for short.

That's why it is incredibly useful to use WORDS that contradict your own return actions. So, when they say "IT ISN'T WHAT IT LOOKS LIKE~!"...

You can say "Ok, I believe you. Thanks for clearing that up."

But then, send a picture in the mail, of that dude sucking the other dudes dick... to REALLY fuck with them. Then, just wait to hear how stupid they sound when they finally get that picture in the mail.

They'll be confused, they'll think...

/-_/-_/-_/-_/-_/-_/-_/-_/-_/-\-/--\

Guy 1 : But, he told us 'Ok, I believe you. Thanks.'...?
 I don't understand why he would SAY (1) thing...

...and then DO (1) OTHER thing...

Guy 2 : Yeah, what sort of ASSHOLE would say (1) thing and then DO another...?

Guy 1 : I don't know, pal.

What the actual fuck, dude.

I'm simply horrified by this...

Guy 2 : I am speechless as well, this is absolutely uncalled for.

See how that conversation right there illustrates how stupid some people are...? It characterizes so many people's mentality PERFECTLY.

Somebody's fuckin' stupid.

They lack the capacity to understand (when/where) someone is intelligent enough to do that same, [SAY (1) thing \rightarrow but DO (1) OTHER thing] process, in return.

That's because some people are genuinely (stupid + predictable).

You really can't expose how stupid some people are, by following conventional rules of society, and following the code of conduct or terms of service or shit like that.

Nah. Sometimes you just gotta whip out the big guns, and call a bunch of malicious cocksuckers out for being as fuckin' stupid as they are, and use every fucking word in the book.

25:13 - In response to our reporting, NSO said:

"Our technology was not associated in any way with the heinous murder of Jamal Khashoggi." "This includes listening, monitoring, tracking, or collecting information."

Standard-issue lying cocksuckerism right there.

If a dude from Citizen Lab says "HEY, URL TYPED INTO BROWSER, LINKED TO PEGASUS SPYWARE"...

But NSO Group says "NOT US IN ANY WAY SHAPE OR FORM"...

That just means that someone's fucking lying.

/-_/-_/-_/-_/-_/-_/-_/-_/-\-

25:13 → 31:45 - Documentary talks about Mexico using Pegasus, which would likely target people in the United States. Pegasus was apparently sold to public entities.

31:45 - I cannot give you my name, nor can I tell you which agencies I worked for.

It would be dangerous for me to be recognized and make it known that I have, or have had, access to certain information.

32:11 - The Pegasus software was new to us.

The procedure was to have the target number do what was called social engineering which is searching for information from open sources about the target in order to construct text messages that could be sent to the mobile device.

- 32:39 You have to make one or two very precise attempts using information that was useful to the target so that they would want to click on the link.
- 32:49 If we succeeded in getting them to click on the message, that automatically installed the software on the mobile device and from then on, we could access all the information on the phone.
- 33:03 The results were incredible, because once we managed to infect a target, we had full access to the mobile device.
- 33:18 At the top left, we had the main display.

And on the right side and at the bottom were tabs where you had each of the applications from which information was extracted.

- 33:39 For example, we had the icons for WhatsApp, Telegram.
- 33:47 At the bottom, we had the microphone, the cameras, the geolocation, and depending on what we were interested in, we would click on it and it would appear on the main screen.
- 34:04 After infection, we can see even deleted information, whether that was photos or conversations, we could always have access to them.

Now, all of that description right there should scare the shit out of people.

I've only been saying that I knew the shit was on my device as far back as January 15th, 2019 if not beforehand.

But- the problem is that when attempting to explain to other people that shit like this EXISTS...? You'll run into a wave of clueless fucking morons that don't believe something this sinister EXISTS, or was used to attempt to murder you, or track you, surveil you, or what have you... and further to that point...?

Every single fucking time that you try to talk to people about it, they'll immediately oust you as being "DELUSIONAL".

Courtesy of RICHARD TODD LOEBER at SARATOGA HOSPITAL, and a bunch of clueless morons at (SCSO/NYSP). I knew this fuckin' program existed, and was used to track me and surveil me, because I started a DIGITAL SECURITY company, and I had a REALLY STRONG FEELING THAT I WAS BEING WATCHED FROM TIME TO TIME.

That's not PARANOIA, it's not SCHIZOPHRENIA, it's nothing but just BEING MORE AWARE OF MY SURROUNDINGS than everybody else. In fact, I had an interview with OLIVER ROBINSON and his ASSISTANT, back in OCTOBER 2020 at or about the time that PAUL PELAGALLI allowed LISA MENTES to have CUSTODY of my fucking children...

...and I tried to tell the SUPERINTENDANT of the SCHOOL DISTRICT that my KIDS were attending...
"Hey, uh- some people are spying on unsuspecting victims, and I was the only person in the town of Clifton
Park NY, that KNEW this shit was being used on me, back between MAY 2020 and JUNE 2020."

Cool...?

Cool. Some people are really fuckin' stupid.

I'll continue.

35:00 - Former President Enrique Pena Nieto has denied that his adm'n used Pegasus to spy on journalists.

He insists his family's purchase of Casa Blanca was "fully legal."

In response to our quesitons about Pegasus in Mexico, NSO said it would not confirm or deny which governments are its customers.

So what that means is that they're saying "Fuck you, and your mother, right in the ear canal. Bye."

/--__/

- 35:25 [Laurent Richard] All the time during this investigation, we tried every day to identify the person behind that phone number. This is what all the partners in Forbidden's team were doing most of the time.
- 35:40 [1: Audrey Travere/2: voice of dissident]
- 35:40 [1]: Basically the consortium had access to a list of potential targets.
- 35:44 [2]: And they included my number...?
- 35:46 [1]: Exactly. To be sure that you (was/were) indeed infected or surveilled, we would have to run forensic analysis.
- 35:54 [2]: When I hear this from you, I was a little bit not sure to talk. (The person is terrified)
 And I don't know if my giving a call to you it will help me.
 I dont' know because I dont' trust the governments anymore.
- 36:12 [2]: So I do not want to put myself or my family under risk. (The person is already under risk) I hardly reach that stage, I realize... sorry.
- I realized this country cannot be trust.
- 36:36 [2]: If you ask me, I am very angry. 36:37 [1]: Of course, of course.

So, beside my banter that is supposed to be somewhat comedic littered here and there and everywhere in between, the person in this phone call is the typical person in society that finally realizes that guys like Michael C. fuckin' Cook, Julien Assange, and Edward Snowden, have been trying to tell them that governments often do some really shady trollmeister 5000 type shit, and when I listen to somebody having this conversation with a person from Forbidden Stories... I can sense that somebody is actually quite terrified of the situation they're in.

Imagine amplifying how this person felt in that phone call, by about 5000, and having caught in a video, a dude walking around using this fuckin program to do all of the shit that was described up above. Yeah.

That's what people like Kristin Johnson, Laura Hughes, Michael Zurlo, and Trooper Borden did, was to treat my whole entire situation as if it was outright ridiculous. Fuck every single one of you.

- 36:51 [Laurent Richard] I saw one number in the list that belonged to a friend, a journalist in Azerbaijan.
- 37:01 Her name is Khadija Ismayilova. She's an award-winning investigative reporter and an outspoken critic of the government, renowned for her exposes of corruption at the hands of the country's president.
- 36:51 [Laurent Richard] In Azerbaijan, you have a lot of oil and gas. It's a dictatorship. And the dictators name is Ilham Aliyev. And, this person and this state is extremely violent against dissidents, political opponents, journalists.
- 37:33 [Paul Radu/Organized crime and corruption reporting project] I first met Khadija Ismayilova in Azerbaijan in about 2006/2007. Khadija Ismayilova relentlessly kept on exposing the wrongdoing and the corruption of the Aliyev regime. She showed how you know, they were having their hands into a big chunk of the Azerbaijani economy. She was showing how they were, you know, taking money in a covert way... How they were STEALING money, basically, from the people.

__/--\

The team manages to intercept Khadija at an airport in Turkey, and then the team talks to her about the program.

- 40:38 [Conversation between 1: Miranda Patrucic, 2: Khadija Ismayilova]
- 40:38 [1]: So we have about 1,000 numbers form Azerbaijan and you're among them.
- 40:44 [2]: *surprised/not so surprised/smiling* Oh~!
- 40:46 [1]: Then we ALSO have some people who are your friends.
- 40:50 [2]: Ok, and what does that program do...?

It skullfucks people beyond all recognition in terms of providing some shady trollmeister 5000 extraordinaire direct access to your phone, equipment, applications, website accounts, emails, text messages, calendar stuff, contacts, pictures, videos, audio recordings, notes, GPS location, all that fun shit.

It's some real shady trollmeister 5000 type shit that you don't really want on your phone, and even if you KNOW it is there...? There exists (0) people that call themselves police officers, that will ever give a shit. They'll even call you psychotic for thinking that such a realistic program even exists.

That's what the program does. My uncle Rick Smith should probably consider that is the reason why I assaulted my stepfather Michael Streeter on 05/19/2020, because I told him about it, and my stepfather laughed at me.

Fuck you, dude.

- 40:57 [1]: It basically without you knowing, um, it installs things on your phone
- 41:03 [2]: *bleep*
- 41:03 [1]: and then it allows...
- 41:06 [2]: Even if I didn't click on anything...?
- 41:08 [1]: Yes
- 41:09 [2]: *looks away like "Shit, that makes perfect fuckin' sense, bro... ffs."*
- 41:09 [1]: Yes, so the secrecy of this, it's called Pegasus, and the secrecy of it is that you don't actually see or you don't do anything. So before, you had to click on something to be infected.

 In THIS case, it ALL happens in the background (That means it doesn't have to be clicked on), and you have NO IDEA that your are infected.

`__/--__

Unless you are as OBSERVANT and INTELLIGENT as I am... and you're able to consider doing things to MANIPULATE a surveilling party with MALICIOUS INTENTIONS. Then, they're actually really easy to manipulate, and they won't be able to stop paying attention to every little fuckin' thing you do.

So, then you can go around the town of Clifton Park, NY like I did, or walk to Stratton Air National Guard, and like, try to tell people about this shit...? But- people will think you're a whack job. Meanwhile, someone is definitely watching you whereever you're going, and putting bad words into people's ears, and slandering your reputation while some rich bastards are behind every single person's doubt.

The uncanny valley.

/--__/

- 41:31 [1]: And when you're infected, it's transmitting your messages, your images, everything that's happening on your phone, including on signal because they have the phone itself.
- 41:39 [2]: And it's legal to sell it...?
- 41:41 [1]: Yes (technically it isn't...), so what we know is that most likely, sometime in 2018 the government got it.
- 41:49 [2]: Okay.
- 41:49 [1]: And we have a lot of data from 2019.

 And you know that was a big year of protest.
- You were on a hunger strike with other people. 42:00 [2]: Yeah.
- 42:00 [1]: You guys had a woman march, you were leading the march.

At this point, people get to see the reaction from somebody that probably had a feeling that they were being watched that whole time, and is sort of smiling about having been the center of attention.

This program does more than just exploit what someone is doing, it taps into the psychology of the target, and the people who use these programs, they know what their motivations are, what they're likely to do, how interesting the shit they do typically is, they can control their range or sphere of influence, they can censor the target, quiet their social media posts, limit their visibility, effectively performing the same exact thing as killing or silencing somebody, right...? Without tipping off the person's awareness...

...unless you're somebody like me, then what'll happen is that weak-dicked psychiatrists like RICHARD TODD LOEBER, or weak-dicked police officers that work for the Saratoga County Sheriffs Office of the New York State Police...? They're gonna need a lot of Viagra to get their dicks up, when I come along, and expose something that they were too fucking lazy to investigate.

I'm willing to include some of the people at the Federal Bureau of Investigation as well, because I had a conversation with [Christopher Murphy] back in JANUARY 2020, when CPS was called to my house for the SECOND TIME... and then the lady from CPS was just so fucking kind in the WAY that she responded to an erroneous fucking complaint...? She felt COMPELLED to purchase my kids a couple of brand new beds.

Awww... How thoughtful.

Here's an idea.

How about, the fuckin' scumbags that decided to slander me and use these programs, how about they pull the dildos out of their assholes, right...? And then, I could SUPPORT MYSELF AS WELL AS MY CHILDREN, and then purchase the fucking beds myself.

That would've been a really cool way to go about not being a fucking demonic piece of shit. But also... the CYBERATTACKS that I recorded on VIDEO...

```
| Asus Q504UA Display Interference | 10/04/19 1200 | https://youtu.be/in7IrkoLOHo | Twitter Login BSOD | 12/09/19 1600 | https://youtu.be/12x8Tr09B5Q | Buffer Overflow attack | 10/04/19 1200 | https://youtu.be/H4MlJnMh9Q0 |
```

Those ALL occurred AFTER CVE-2019-8936 was used in a COMBINATION/MULTIPRONGED ATTACK on:

```
| January 15<sup>th</sup>, 2019 @ 1602 US-9, Clifton Park, NY 12065 |
```

Which included:

- 1) CVE-2019-8936
- 2) DISTRIBUTED DENIAL OF SERVICE
- 3) RANSOMWARE ATTACK SIMILAR TO WANNACRY by the NATIONAL SECURITY AGENCY,
- 4) complete homosexuality.

Emphasis on the last thing on that list right there, cranked well past 11. 11 being a reference to Spinal Tap.

That's the power of Pavel Zaichenko, working with a group of hackers like APT29...
...and a bunch of morons in Clifton Park NY having no fucking clue that they even exist.

clap clap But also, it sorta looks like THIS might come in WICKED FUCKIN' HANDY...

```
| 07/21/89 | https://drive.google.com/file/d/1y05kPm-CjVIALi6r8CNPMlIRnXvMtPpD |
```

That right there, is this thing that the police in Saratoga and Albany county, have been really fuckin clueless and lazy about collecting or doing anything about (including Cameron Missenis and Paul Zurlo like on 7/14/20)... It's called a "clue". And it might actually be WICKED RELATED to the circumstances, BELIEVE IT OR NOT~! Wow.

I USED to think that police officers and/or investigators COLLECT these things called "clues". But- after the last (3) fucking years, I've learned that they ONLY do that when they have the INCENTIVE to do so.

If they DO NOT have the INCENTIVE to COLLECT CLUES...?
They actually don't put any fucking effort at all, into collecting them at all.
Not a fuckin' chance, dude.

My uncle Rick Smith worked at the NYSP Training Academy for about (40) fucking years, and not (1) time, has he ever personally heard of a single officer he's fed as the chef at that fucking place... being a lazy fuck.

Not (1) time has he ever heard of a single police officer pulling ANY fucking shady trollmeister 5000 shit... Not in his tenure.

No fucking way, chum.

My uncle Rick Smith...?

he's the premiere fucking LEADER, in knowing whether or not somebody in his beloved fucking training academy...
...would EVER pull some shady trollmeister 5000 shit.

So, if anybody was doin' that at all...?

He would've been the first person to find out.

And, he knows some really fuckin important people at that god damn academy.

NOTHING would EVER slip under their fuckin' noses.

Not a god damn chance.

Oh wait, I'm being sarcastic.

```
/-\_/-\_/-\_/-\_/-\_/-\_/-\_/-\_/-\_/-\
```

42:30 - [Conversation between 1: Miranda Patrucic, 2: Khadija Ismayilova cont'd]

42:30 - [2]: Is there any way to avoid this surveillance...?

42:35 - [1]: Yes, we will set you up with a new device that you will be able to use, and a phone.

42:42 - [2]: Is there a balcony...?

43:01 - [2]: It's like... it makes you to want to live in the bubble.

But then, like, so no one can enter.

Like in some sort of... like living inside the condom.

But then you cannot reproduce.

Pretty sure it's worse than that, but that's an alright analogy.

At which point, Claudio plugs the iPhone device into his laptop and jailbreaks the phone, and is able to navigate the content of the device. In the case of MY device, it says "DEVICE DISABLED" and then when I plug a wire into it, it doesn't recognize that the wire is plugged in.

It's weird how the wire worked in that video I posted a link to up above, on 05/24/20...

```
| 05/24/20 | Homosexuals performing a MAN IN THE MIDDLE attack |
| https://youtu.be/i88AJb_5zY4 |
```

It's ALSO weird how I literally uploaded some shit to my Google Drive account on the night of 05/24/20 into the morning of 05/25/20, and for some fuckin' reason...? Some of the files I uploaded...?

Google actually received them.

But when I went to actually look at them...?

Uh-oh. Some homosexual in the middle actually tried to remove those files~!

That's the power of having "dick-in-somebodys-mouth" revealing capabilities like I have.

After posting on Twitter that my shit was actually intercepted...?

Somebody from Google RESTORED the pictures I had uploaded.

Almost as if somebody HAD a dick in the mouth, but then they didn't FEEL like being SEEN with a dick in their mouth, and then they eliminated the pictures I took of the Town of halfmoon Town Hall AFTER talking with Eric Catricala that same fuckin' day... right? Dude is on the Town of Halfmoon Town Board. Fuckin' amazing guy.

Drives around in a black fucking Lexus, license plate NYS/SA-16, glasses, gray hair, doesn't APPEAR to be a real threatening, menacing son of a bitch or anything like that... and, used to live on Anchor Drive or whatever.

But- appearances can be deceiving. He does own the Catricala Funeral home, the place where I was attacked. The video I recorded of (2) douchebags using this program...? Literally in front of the Catricala Funeral Home.

45:17 - We see processes that we know are connected to Pegasus, that are connected to the attacks.

Because this might indicate what was the entry point.

Oh it was Apple Music... What the (bleep)...

Apple Music.

In MY case...?

I downloaded the "Remote Desktop" program from the Apple Store, at or about January 11th-15th 2019, and used it to connect to the WDS server at the Clifton Park Computer Answers store, at some point AFTER I recorded this video of the OpnSense configuration video I recorded here...

```
| 12/20/18 1108 | OPNSense Configuration | \underline{\text{https://youtu.be/eD0-VQ2y\_yg}} |
```

After I had initially suspected that the CYBERATTACK that I described up above that utilized the WannaCry derivative ransomware attack, I actually formatted my device, and (Pavel Zaichenko/Dwayne Coonradt) offered me an opportunity to run the Bennington VT store.

Cool

Cyberattack against Michael Cook → Offer him Bennington VT store, to get him to not pay attention. That's how some fuckin' douchebag named Pavel Zaichenko Jr. gets down.

Don't worry about the TROJAN that was installed as a printer driver at Soft N' Cushy Auto Upholstry in Schenectady NY, where I did \$1500 worth of work in November 2018 that the dude never paid me for... cause he had this shit on his phone (apparently), and that's why his dad was getting SEXUAL FAVOR EMAILS from fuckbuddies spamming his email account.

Cool...?

This is how being a forensic analyst works...

You see something that would NEVER really be suspected of being an ENTRY POINT or an ATTACK VECTOR...?

And then, you start to DEVELOP SUSPICIONS toward a \$3T company being ran by some homosexual named Tim Cook.

That's how it works.

To be clear, there's nothing wrong with someone BEING a homosexual, if that's what they prefer to be. What's REALLY WRONG with being a homosexual, is when that person starts LYING about their sexuality.

It's really this simple...

People who ARE NOT homosexuals are gonna wind up having sex with people of the OPPPOSITE sex.

People who ARE homosexuals are gonna wind up having sex with people of the SAME sex.

So, if you hear somebody talk a huge fucking game about banging the snot out of FEMALES...? And all they really ever do is hang out with DUDES...?

That doesn't IMMEDIATELY INDICATE that they're doing anything SEXUAL with those DUDES. But- watch for the little subliminal cues, or casually incorrect references between them.

They might say something like "Hey babe- I MEAN, dude."

Calling some dude "babe" by accident...?

I mean, it might've been skillfully hidden up until that point.

From that point forward, however...?

People are going to be pretty fuckin' suspicious.

Apple Music.

[1: Claudio, 2: Miranda]

45:37 - [1]: That's weird.

45:40 - [2]: So they might've started using Apple Music to exploit it...?

45:49 - [1]: I have to do some more digging on this, because I need to look at what specifically these applications are.

45:58 - [1]: She's definitely among the ones most targeted.

46:15 - [Claudio] - It's important to rectify this story which is that these technologies are used exclusively used for good purposes and for fighting evil and for fighting crime and terrorism and all that.

[1: Claudio, 2: Khadija]

46:38 - [2]: Hi. So now tell me how bad it is.

46:50 - [1]: Okay there are definitely some records that, that indicate various points where the phone seemed to have been compromised.

47:04 - [1]: (lose focus of dialogue) So I started feeling like a plague doctor in the 1300s.

I'm basically kind of just keeping the death count.

I'm contributing to creating a trauma here, (exposing it isn't contributing)

and I can see it, like I can see it, that they are, right now, they're going through
a dramatic moment, and I'm like that person in the room that is breaking it.

47:30 - [1]: (back to dialogue): There are also some more recent records from even as recent as early May of this year, so until a couple of weeks ago. But all in all, it seems like this probably extended between 2019 and 2020. 2020 at the very least.

47:46 - [2]: I've been told that you will not know what exactly had been monitored or recorded.

47:54 - [1]: Yeah, with this kinds of kind of monitoring technology, the point where they have that level of access to the device, virtually everything is possible, so...

__/--\

At which point, Khadija leaves the room with a look on her face where she seems to understand that some chupacabra was sitting on her chest that whole entire time.

/--__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--

48:28 - [Khadija Ismayilova] - All night I've been thinking about what did I do with my phone...?

And I feel GUILTY. I feel guilty to for the messages I've sent. I feel guilty for the information sources that, that... who send me, thinking that some encrypted messaging ways are secure.

They did it, and they didn't know that my phone is infected.

I mean, my family members are also victimized.

The sources are victimized, everyone.

I mean, people I've been working with, people who told me their private secrets are victimized. Everyone, I mean, it's not just me.

I put so many people in danger.

And, and I'm angry.

Again, I'm angry, I'm angry with the government, I'm angry with the companies that provude all these tools and sell it to the bad guys, like Aliyev's regime.

It, it's... really, it's despicable. It's heinous.

49:51 - Azerbaijan has publicly called the Pegasus allegations a "baseless fabrication."

NSO did not respond to specific quesitons about Azerbaijan and Pegasus.

But then again, we've heard that sort of rhetoric before.

Ya know...?

Did the towel-headed Taliban take the Twin Towers in terror...?
Or, did the ball-chinned Bush boy forever banish the balancing of the budget...?

We may never truly know the truth about anything...

Too many lying sacks of shit...?

Not enough truth tellers.

It's just an endless war.

One side...?

A plethora of positive Pam's.

The other...?

A number of negative Nancy's.

It's gonna seem pretty fuckin' stupid after a while... but- it's the only way to make light of the situation.

/--__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--__/--

50:07 - Khadija is not a terrorist, Khadija is not a criminal.

She's a journalist that is taking a lot of risk wo write some stories to make sure people will get access to independent information. So that was one more evidence of the global misuse of that spyware.

50:33 - Powerful governments manage to retain their power by seeing off threats from people who are campaigning for democracy, or holding them to account, telling the truth. And you know, here's a company that gave them a tool to do that.

Sorta sounds EXACTLY like the rhetoric I had back when I recorded this video...

05/25/20 1028 | PRISM \rightarrow meant to be used to protect people, not for generating revenue https://drive.google.com/file/d/ISDTqxE12WiYfD3WhgYHzXXIVJ2h9aU-D

- 51:09 You got a real sense that it was a free-for-all. There is no control over how countries use it, and they have been using it in the worst way you could imagine.
- 51:23 [Laurent] Even after months of investigating, we kept discovering new things, new names from the list-politicians, heads of state, and even a princess.
- 51:37 [Latifa Al-Maktoum] Hello, my name is Latifa Al-Maktoum. And, I'm making this video because... it could be the last video that I make, yeah.

That's the end of the first part of this story by Frontline PBS.

I've spent the last almost (3) years or so, talking about what happened to me back on May 2020.

I tried to talk to people about what happened BEFORE things actually began to happen...

Then, when I told my mother and stepfather that SOMEONE WAS STALKING ME AND I WAS PRETTY FUCKING CERTAIN OF IT...
...nearly everyone I told, cast my OBSERVATIONS and EXPERIENCE off as something really fucking ridiculous.

In fact, it has caused such a large rift between myself and nearly everyone I've ever known in life...
...that I've lost a lot of faith in humanity.

Couldn't be more fucking serious about that.

Someone decided that it would be a fun little game to play with Michael C. Cook, to use this remote software to attack me and my business from October 2018 and onward.

The COOL thing is, now I have a good idea on how to expose the types of people who would use this software. And, how to catch them in the act (because I did that back in May 2020)...

And, how the police and citizens will actually be really doubtful that anyone would have any reason to use it to watch what they're doing or whatever.

Michael C. Cook Sr. | Security Engineer | Secure Digits Plus LLC |
